A2575-14

BASIC PETROLEUM DATA BOOK

Petroleum Industry Statistics

Volume II, Number 2
May 1982

American
Petroleum
Institute

The American Petroleum Institute, incorporated in 1919 under the laws of the District of Columbia, serves as a forum, information bureau, technical clearing house, and national trade association for the petroleum industry.

Beginning with Volume 1, Number 1, the Basic Petroleum Data Book will be updated three times a year. Each issue will be an independent newly-printed book which can be discarded when subsequent volumes are released. This format supersedes the original loose-leaf Data Book first printed in October 1975.

TABLE OF CONTENTS

SECTION I. ENERGY

Table 1. World Energy Consumption, historical
Table 2. World Energy Consumption, projections
Table 3. U.S. Economic, Demographic & Energy Indicators
Table 4. Comparisons of U.S. Energy Supply Projections
Table 5. Comparisons with other Projections
Table 6. U.S. Gross Energy Consumption by Sources
Table 7. Gross Consumption of Mineral Resources and Electricity from Hydropower and Nuclear Power
Table 8. U.S. Production of Energy by Source
Table 9. U.S. Production of Mineral Energy Resources and Electricity from Hydropower and Nuclear Power
Table 10. U.S. Gross Energy Consumption by Sector
Table 11. U.S. Net Energy Consumption by Sector
Table 12. U.S. Energy Input Demand to Industrial Sector
Table 13. U.S. Energy Input Demand to Household and Commercial Sector
Table 14. U.S. Energy Input Demand to Transportation
Table 15. U.S. Energy Input Demand to Utilities
Table 16. U.S. Volume of Energy Utilized for Generation and Electric Power Consumed
Table 17. U.S. Sectorial Petroleum Demand—Fuel vs. Non-Fuel
Table 18. U.S. Sectorial Gas Demand—Fuel vs. Non-Fuel
Table 19. U.S. Sectorial Coal Demand—Fuel vs. Non-Fuel

SECTION II. CRUDE OIL RESERVES

Table 1. Proved World Reserves of Crude Oil
Table 2. The Supply of U.S. Crude Oil
Table 3. Proved Crude Reserves—Twenty Leading Nations
Table 4. USGS Estimates of U.S. Oil and Gas Reserves

SECTION III. EXPLORATION AND DRILLING

Table 1. Exploratory Wells and Footage Drilled In U.S.
Table 2. Development & Total Wells and Footage Drilled In U.S.
Table 3. U.S. Petroleum Geophysical Exploration
Table 4. Free World Geophysical Exploration
Table 5. Historical Record: New Field Oil Discoveries Proved to be of Significant Size
Table 6. Historical Record: New Field Gas Discoveries Proved to be of Significant Size
Table 7. Historical Record: New Field Oil & Gas Discoveries Proved to be of Significant Size
Table 8. U.S. Estimated Drilling Costs—Onshore
Table 9. U.S. Estimated Drilling Costs—Offshore
Table 10. U.S. Estimated Drilling Costs—All Wells
Table 11. Free World Total Well Completions
Table 12. Free World Total Exploratory Well Completions
Table 13. U.S. Annual Average Rotary Rig Activity by State
Table 14. U.S. Total Wells Drilled by State
Table 15. Annual U.S. Rotary Rig Census
Table 16. Producing Gas and Condensate Wells, by State
Table 17. Producing Oil Wells, by State
Table 18. Producing Oil and Gas Wells, Free World

SECTION IV. PRODUCTION

Table 1. World Crude Oil Production by Area
Table 2. World Crude Oil Production by Area
Table 3. World Crude Production—20 Leading Nations
Table 4. U.S. Stripper Wells and Production
Table 5. U.S. Crude Production by State
Table 6. U.S. Crude Production Per Well Per Day by State

SECTION V. FINANCIAL

Table 1. Average Hourly Earnings: Mining and Manufacturing vs. Oil and Gas Production and Refining
Table 2. Number of Employees: Oil and Gas Extraction and Refining
Table 3. Sources of Capital of a Group Petroleum Companies
Table 4. Net Income as a Percent of Net Worth: Petroleum vs. Other Industries
Table 5. Domestic and Foreign Net Income of a Group of Petroleum Companies
Table 6. World Petroleum Industry Capital and Exploration Expenditures
Table 7. Sources and Uses of Working Capital of a Group of Petroleum Companies
Table 8. Domestic and Foreign Capital Expenditures of the World Petroleum Industry
Table 9. Estimated U.S. Exploration and Development Expenditures
Table 10. U.S. Estimated Expenditures for Exploration, Development and Production
Table 11. Environmental Protection Expenditures of the Petroleum Industry within the U.S.

SECTION VI. PRICES

Table 1. Average Annual Wellhead Price of U.S. Crude
Table 2. Average Annual Wellhead Price of U.S. Natural Gas
Table 3. Trend of Wholesale Prices of Commodities Used in Petroleum Production
Table 4. Trends of Regular Grade Gasoline Prices vs. Prices of Other Consumer Goods and Services
Table 5. U.S. Annual Average Retail Price for Number 2 Home Heating Oil
Table 6. U.S. Natural Gas Liquids—Average Annual Price at Processing Plants
Table 7. Total Dollar Value of Crude Oil and Natural Gas at the Wellhead
Table 8. U.S. Average Wellhead Value Per Barrel of Crude by State
Table 9. U.S. Average Wellhead Value of Natural Gas by State
Table 10. Posted Prices of Key Foreign Crudes
Table 11. Official Government Selling Prices of Key Foreign Crudes
Table 12. Average U.S. Retail Gasoline Prices for Selected Cities
Table 13. Cost of U.S. Petroleum Imports

SECTION VII. DEMAND

Table 1. Estimated World Demand for Refined Petroleum Products by Area
Table 2. Estimated World Demand for Refined Petroleum Products by Area
Table 3. Total U.S. Supply and Demand for All Oils
Table 4. U.S. Supply and Demand for Total Gasoline
Table 5. Total U.S. Supply and Demand for Motor Gasoline
Table 6. Total U.S. Supply and Demand for Distillate Fuel Oil
Table 7. Total U.S. Supply and Demand for Residual Fuel Oil
Table 8. Sales of Distillate and Residual Fuel Oils to Electric Utilities
Table 9. Motor Gasoline Consumption in the U.S.
Table 10. U.S. Sales of Distillate Fuel Oil by State
Table 11. U.S. Sales of Distillate Fuel Oil by Uses
Table 12. U.S. Sales of Residual Fuel Oil by State
Table 13. U.S. Sales of Residual Fuel Oil by Uses
Table 14. Total U.S. Supply and Demand for Naphtha Type Jet Fuel

Table 15. Total U.S. Supply and Demand for Kerosine Type Jet Fuel
Table 17. Total U.S. Supply and Demand for Natural Gas Liquids and Liquefied Refinery Gases
Table 18. Total U.S. Supply and Demand for Lubricants

SECTION VIII REFINING

Table 1. Estimated Worldwide Crude Oil Refining Capacity by Area
Table 2. Worldwide Crude Oil Refinery Runs
Table 3. U.S. Crude Oil Refining Capacity
Table 4. Percentage Yields of Refined Petroleum Products from Crude Oil in the U.S.
Table 5. U.S. Crude Oil Refinery Runs by PAD District—Foreign vs. Domestic
Table 6. Number and Capacity of U.S. Petroleum Refineries

SECTION IX. IMPORTS

Table 1. The Share of Imports in U.S. Domestic Petroleum Demand
Table 2. Total U.S. Imports of Petroleum and Petroleum Production
Table 3. U.S. Crude Oil Imports by Area
Table 4. U.S. Imports of Crude Petroleum by Country of Origin
Table 5. U.S. Imports of Crude Oil by P.A.D. Districts
Table 6. U.S. Imports of Distillate and Residual Fuel Oil by P.A.D. Districts
Table 7. U.S. Imports of Unfinished Oils and Refined Products by P.A.D.
Table 8. Total U.S. Petroleum Imports by Source
Table 9. U.S. Direct Petroleum Imports from Members of OAPEC, September 1973–April 1974

SECTION X. EXPORTS

Table 1. Total U.S. Domestic Production and Exports of Petroleum
Table 2. U.S. Exports of Petroleum to Selected Areas
Table 3. African Oil Exports to Selected Areas
Table 4. Middle East Oil Exports to Selected Areas
Table 5. The Role of Middle East and African Oil in Western European and Japanese Consumption
Table 6. The Role of Middle East and African Oil in World Exports

SECTION XI. OFFSHORE

Table 1. Estimated World Production of Crude Oil, Onshore vs. Offshore
Table 2. Estimated Worldwide Offshore Production of Crude Oil by Areas
Table 3. Production and Value of U.S. Crude Oil and Condensate, Onshore—Offshore
Table 4. Estimated Worldwide Production of Natural Gas, Onshore vs. Offshore
Table 5. Estimated Worldwide Offshore Production of Natural Gas by Areas
Table 6. Production and Value of U.S. Natural Gas, Onshore—Offshore
Table 7. Total Offshore Wells Drilled in the U.S., Federal and State Leases
Table 8. Accumulated Production State and Federal Offshore Leases
Table 9. U.S. Outer Continental Shelf Oil and Gas Lease Sales
Table 10. U.S. Outer Continental Shelf Revenue and Production Value
Table 11. U.S. Outer Continental Shelf Oil and Gas Sales, Total Bonus vs. Total Amount of All Bids Received
Table 12. State and Federal OCS Production
Table 13. United States Offshore Platforms
Table 14. Worldwide Water Depth Records
Table 15. Eight-Year OCS Blowout Experience
Table 16. Oil Spill Incidents of 238 or More Barrels
Table 17. Historical Data on Leasing Continental Seabeds Adjacent to the U.S.
Table 18. Basin Ranking
Table 19. Proposed 5-Year OCS Oil and Gas Leasing Schedule

SECTION XII. TRANSPORTATION

Table 1. Mileage of Petroleum Pipelines in the U.S.
Table 2. U.S. Gas Utility Industry Miles of Pipeline by Type
Table 3. U.S. Tank Ship Fleet
Table 4. World Tank Fleet
Table 5. Age Distribution of World Tanker Fleet by Major Flag of Registry
Table 6. Spills of Oil and Other Substances
Table 7. Total and Average Travel of U.S. Motor Vehicles
Table 8. Total and Average Consumption of Motor Fuel by U.S. Motor Vehicles

SECTION XIII. NATURAL GAS

Table 1. Estimated Proved World Reserves of Natural Gas
Table 2. The Supply of U.S. Natural Gas
Table 3. World Marketed Production of Natural Gas by Areas
Table 4. World Marketed Production of Natural Gas by Areas
Table 5. Salient Statistics of Natural Gas in U.S.
Table 6. U.S. Imports of Natural Gas by Source
Table 7. Estimated Natural Gas Reserves—Twenty Leading Nations
Table 8. World Natural Gas Production—Twenty Leading Nations
Table 9. U.S. Marketed Production of Natural Gas by State
Table 10. U.S. Consumption of Natural Gas by State

SECTION XIV. OPEC

Table 1. OPEC Crude Oil Reserves
Table 2. OPEC Crude Oil Production
Table 3. U.S. Total Petroleum Imports from OPEC Nations
Table 4. U.S. Crude Oil Imports from OPEC Nations

SECTION XV. MISCELLANEOUS

Table 1. Estimated Average No. of Employees in Important Segments of the Petroleum Industry
Table 2. Emergency Energy Conservation Measures Having Potential for Sizeable Savings in Near Future
Table 3. Conversion Table

SECTION I. ENERGY

Table 1. World Energy Consumption and Fuel Shares: History 1960, 1973, 1978
Table 2. World Energy Consumption and Fuel Shares: Midprice Projections
Table 3. Selected United States Economic, Demographic, and Energy Indicators
Table 4. Comparisons of U.S. Energy Supply Projections for 1990
Table 5. Comparisons with Other Projections of 1990 End-Use Quantities and Prices
Table 6. United States Total Gross Consumption of Energy Resources by Major Sources
Table 7. Gross Consumption of Mineral Resources and Electricity From Hydropower and Nuclear Power In the United States
Table 8. United States Total Production of Energy Resources by Major Sources
Table 9. U.S. Production of Mineral Energy Resources and Electricity From Hydropower and Nuclear Power
Table 10. Total U.S. Gross Energy Consumption by Consuming Sector
Table 11. Total U.S. Net Energy Consumption by Consuming Sector
Table 12. United States Demand for Energy Inputs to the Industrial Sector
Table 13. United States Demand for Energy Inputs to the Household and Commercial Sector
Table 14. United States Demand for Energy Inputs in the Transportation Sector
Table 15. United States Demand for Energy Inputs for Electricity Generation by Utilities
Table 16. United States Volumes of Energy Utilized for Generation and Electric Power Consumed
Table 17. United States Sectorial Demand for Petroleum—Fuel Use vs. Non-Fuel Use
Table 18. United States Sectorial Demand for Natural Gas—Fuel Use vs. Non-Fuel Use
Table 19. United States Sectorial Demand for Coal—Fuel Use vs. Non-Fuel Use

---

(1) Gross energy is the total of inputs into the economy of the primary fuels (petroleum, natural gas, and coal, including imports) or their derivatives plus the generation of hydro and nuclear power converted to equivalent energy inputs.

[r] Revised

[p] Preliminary

[1] Gross energy is that contained in all types of commercial energy at the time it is incorporated in the economy, whether the energy is produced domestically or imported. Gross energy comprises inputs of primary fuels (or their derivatives), and outputs of hydropower and nuclear power converted to theoretical energy inputs. Gross energy includes the energy used for the production, processing, and transportation of energy power.

[2] Includes anthracite, bituminous, lignite coal, and imported coke.

[3] Petroleum products including still gas, liquefied refinery gas, and natural gas liquids.

[4] Output of hydropower (adjusted for net imports or net exports) and nuclear power converted to theoretical energy inputs calculated from national average heat rates for fossil-fueled steam-electric plants provided by the Federal Power Commission.

[5] Less than one-tenth of one percent.

---

[r] Revised

[1] Includes anthracite, bituminous and lignite coals.

[2] Less than one-tenth of one percent

[3] Includes Alaska

[4] Denotes first year for which figures include Alaska and Hawaii

(r) Revised

(p) Preliminary

(1) Includes anthracite, bituminous and lignite coals

(2) Includes natural gas plant liquids

(3) Figures do not total due to omission of geothermal power and electricity produced from wood and waste.

[r] Revised

[1] Gross energy is that contained in all types of commercial energy at the time it is incorporated in the economy, whether the energy is produced domestically or imported. Gross energy comprises inputs of primary fuels (or their derivatives), and outputs of hydropower and nuclear power converted to theoretical energy inputs. Gross energy includes the energy used for the production, processing, and transportation of energy power.

[2] Data may not add to totals because of independent rounding.

[r] Revised

[1] Net energy is the sector inputs (household and commercial, industrial, transportation, plus miscellaneous) and consists of direct fuels and purchased electricity.

[2] Gross energy is the total of inputs into the economy of primary fuels (petroleum, natural gas, and coal, including imports) or their derivatives plus the generation of hydro and nuclear power converted to equivalent energy inputs.

[3] The conversion efficiency factor is the percent of total gross energy going into the sectors.

---

[1] Includes anthracite, bituminous, and lignite coals

[2] Includes bunkers and military transportation

[3] Utility electricity, generated and imported, distributed on basis of historical series in the Edison Electric Institute Yearbook. Conversion of electricity to energy equivalent was made at the value of contained energy corresponding to 100-percent efficiency using a theoretical rate of 3,412 Btu per kilowatt-hour.

(r) Revised

(p) Preliminary

(1) Includes anthracite, bituminous, and lignite coals.

(2) Includes bunkers and military transportation.

(3) Utility electricity, generated and imported, distributed on basis of historical series in the Edison Electric Institute Yearbook. Conversion of electricity to energy equivalent was made at the value of contained energy corresponding to 100-percent efficiency using a theoretical rate of 3,412 Btu per kilowatt-hour.

(4) Includes 2,269,000 tons of imported coke, equivalent to 59 trillion Btu.

(5) Includes 538,000 tons of imported coke, equivalent to 14 brillion Btu.

(6) Includes 577,000 tons of imported coke, equivalent to 15 trillion Btu.

(7) Includes 5,038,000 tons of imported coke, equivalent to 131 trillion Btu.

(8) Includes 2,538,000 tons of imported coke, equivalent to 66 trillion Btu.

1/ Includes anthracite, bituminous, and lignite coals

2/ Includes bunkers and military transportation

3/ Utility electricity, generated and imported, distributed on basis of historical series in the Edison Electric Institute Yearbook. Conversion of electricity to energy equivalent was made at the value of contained energy corresponding to 100-percent efficiency using a theoretical rate of 3,412 Btu per kilowatt-hour.

---

[r] Revised

[1] Includes anthracite, bituminous and lignite coals

[2] Includes net inputs and negligible amount of hydropower generated by industrial establishments

[3] Less than one-tenth of one percent

---

[1] Gross energy is that contained in all types of commercial energy at the time it is incorporated in the economy, whether the energy is produced domestically or imported. Gross energy comprises inputs of primary fuels (or their derivatives), and outputs of hydropower and nuclear power converted to theoretical energy inputs. Gross energy includes the energy used for the production, and transportation of energy power processing.

[2] Utility electricity, generated and imported, distributed on basis of historical series in the Edison Electric Institute Yearbook. Conversion of electricity to energy equivalent was made at the value of contained energy corresponding to 100-percent efficiency using a theoretical rate of 3,412 Btu per kilowatt-hour.

[3] The conversion efficiency factor is the percent of total gross energy going into the sectors.

1/ Production is the amount originally estimated and used by API in prior reserves reports.

2/ Figures exclude 9.6 billion barrels located in Prudhoe Bay, Alaska (discovered in 1968) which will not be available for production until the Alaskan pipeline, currently under construction, is completed.

3/ Figures include 9.6 billion barrels located in Prudhoe Bay, Alaska.

---

(1) Production is the amount originally estimated and used by API in prior reserves reports.

(2) Figures exclude approximately 10.0 billion barrels located in Prudhoe Bay, Alaska which were not available for production until the Alaskan pipeline was completed in 1977.

(3) Figures include approximately 10.0 billion barrels located in Prudhoe Bay, Alaska.

(4) Beginning with 1980, the Department of Energy collected reserves.

[1] Saudi Arabia and Kuwait share equally the production from the Neutral Zone located between the two nations which had reserves of 17.3 billion barrels in 1975 and 6.4 billion barrels in 1976. This production is not included in the above figures.

[2] Does not include Orinoco heavy oil belt which had estimated reserves of 700 billion barrels in 1975 and 300 billion barrels in 1976

(1) F_{95} denotes the 95th fractile; the probability of *more than* the amount F_{95} is 95%. F_5 is defined similarly.
(2) Mean values may not be precisely additive owing to rounding.
(3) Includes quantities considered recoverable *only* if technology permits their exploitation beneath Arctic pack ice- -a condition not yet met.

[r] Revised

[1] Company-contractor data are not available.

[2] Includes 76 magnetometer crew months not allocated to either company or contractor.

[3] Percentages do not equal 100 percent due to unallocated crew months included in total.

[4] Includes 5 other crew months not allocated to either company or contractor.

[5] Includes 18 magnetometer crew months not allocated to either company or contractor.

[6] Includes 3 magnetometer crew months not allocated to either company or contractor.

[r] Revised

[1] Includes lease condensate.

[2] Saudi Arabia and Kuwait equally share production from the Neutral Zone which amounted to 181,431,000 barrels (497,071 barrels per day) in 1975 and 198,195,000 (543,000 barrels per day) in 1974. This production is not included in the above figures.

Region[2]	
Northeast	134.4
North Central	130.3
South	129.3
West	132.3

---

[1] Area is generally the SMSA. Los Angeles, Long Beach, Anaheim is a combination of two SMSA's, and N.Y.-NE N.J. and Chicago-NW Ind. are the more extensive Standard Consolidated Areas.

[2] Regions are defined as the four Census regions.

[3] Regular, leaded gasoline.

May 1982

COST OF U.S. PETROLEUM IMPORTS
(f.a.s. value)

Year	Quantity[1] (mmb)	Total Value (mm$)	Value Per Barrel
1970	1,353	$ 2,928	$ 2.16
1971	1,565	3,613	2.31
1972	1,874	4,631	2.47
1973	2,470	8,149	3.30
1974	2,411	26,073	10.81
1975	2,382	26,664	11.19
1976	2,850	34,614	12.15
1977	3,192	44,071	13.81
1978	2,903	42,188	14.12
1979	3,194	59,805	18.72
1980	2,566	78,637	30.60
1981	2,236	76,712	34.31

[1] Includes imports into the Strategic Petroleum Reserve and the U.S. Virgin Islands.

---

[r] Revised

[1] Includes benzol, other hydrocarbons, and hydrogen

[2] Represents the difference between supply and indicated demand for crude petroleum, first reported separately in 1968, prior years include adjustments where available

[3] Beginning with 1960, processing gains are reported separately; prior years include adjustments to permit a balance between total new supply and total supply

[4] Separate data not available prior to 1968

[5] Data for this year and those for subsequent years are on a 50-state basis

(r) Revised

(p) Preliminary

(1) Data prior to 1964 is not available on a comparable basis.

(2) U.S. Bureau of Mines altered its stock reporting as of January 1975. On the new basis, year-end 1974 stocks were 224,719 thousand barrels. This figure was used to compute the 1975 stock change.

(3) Totals do not add due to independent rounding.

(4) In 1981, the Department of Energy changed their methodology for calculating motor gasoline, distillate, and residual product supplied. Based on this new methodology, API has reconstructed DOE data for 1978, 1979 and 1980.

---

[1] These figures and those for subsequent years are on a 50 state basis.

[2] Production and stocks at gas processing plants are included in this and subsequent years.

[3] U.S. Bureau of Mines altered its stock reporting base as of January 1975. On the new basis, year-end 1974 stocks were 223,717 thousand barrels. This figure was used to compute the 1975 stock change (Table 6a).

(r) Revised

(p) Preliminary

(1) In 1981, the Department of Energy changed their methodology for calculating motor gasoline, distillate, and residual product supplied. Based on this new methodology, API has reconstructed DOE data for 1978, 1979 and 1980.

(2) Totals may not add due to independent rounding.

[5] Includes range oil

[6] Excludes oil company use

[7] Includes kerosine-type jet fuel: 1976—11,600 bbls. per day; 1977—18,770 bbls. per day; 1978—12,342 bbls. per day.

[8] Includes imports by military

[9] Beginning in 1979, heating oil is no longer a separate category. The figure is derived by adding residential, commercial and farming.

(1) Beginning with 1967, represented use by electric public-utility plants only.

(2) Includes imports by military.

(3) Beginning in 1979, heating oil has been reclassified commercial and is a part of the total called "heating and industrial."

1/ These figures and those for subsequent years are on a 50 state basis.

2/ These figures and those through 1964 include commercial jet fuel.

3/ These figures and those for subsequent years exclude kerosine-type jet fuel.

4/ Beginning with 1967 production at refineries and at plants are combined in one total.

[r] Revised

[1] Total Western Hemisphere includes 307 barrels from Chile in 1977, and 584 in 1978. Also 6,807 barrels from Peru in 1978, 14,746 in 1979, and 14,728 in 1980. Also 369 barrels from Brazil and 782 from Guatemala in 1980.

[2] Total Africa includes 885 barrels from Cameroon in 1978, 5,711 in 1979, and 11,967 in 1980. Also 204 from Ghana in 1979, and 300 in 1980.

[3] Total Middle East include 868 barrels in 1977, 2,530 in 1978, 3,891 in 1979, and 786 in 1980 from Syria.

[4] Total Far East includes 1,848 barrels in 1977, 2,335 in 1978, 2,451 in 1979, and 348 in 1980 from Brunei.

[5] Annual Total include 4,874 barrels from The Peoples Republic of China, 111 barrels from Romania and 74 barrels from Yugoslavia for 1979.

1/ Percentage accumulated revenue of accumulated production value

NOTE: Revenue = charges and/or collection—bonuses and first year rentals adjusted from book transfer dates (years) to Geological Survey from Bureau of Land Management, to actual sales dates. Distribution of escrow funds totaling $39,316,545 to the State of Louisiana and Lessees, pursuant to Supreme Court decree dated December 31, 1965, was not deducted from calendar year 1966 revenue charges, nor was the production value of $157 million deducted. 1970 bonuses increased $951,875 and rentals increased $22,500—leases on appeal validated.

EIGHT-YEAR OCS BLOWOUT EXPERIENCE, 1971-78.(1)

Type	No.	Pollution	Fatalities Injuries	Other Major Damage
Explor. Drlg.	17(2)	None (gas only)		Loss of 2 jackup rigs
Dev. Drlg.	13	None (all gas)	4 minor injuries	Loss of 2 platforms
Prod./Comp./WO	16	725 bbls.(3)	None	1 platform destroyed, 1 badly damaged
Total	46			

Environmental Safety

1971-1978, 46 blowouts; 0 fatalities, 4 minor injuries; 7,553 wells, average of 1 blowout/250 wells; total spillage, less than 1000 barrels out of 2.8 billion barrels produced.

(1) From USGS Open-File Report 80-101.

(2) All in water depths < 400′; during 1975-78, 67 wells drilled in water depths > 600′ with no blowouts. Blowout distribution by rig type roughly proportional to rig use in GOM. In frontier areas, 70 wells have been drilled (through 7/30/79) without a blowout.

(3) During same period, 2.8 billion barrels of oil and condensate were produced.

Total	48.0	825.5	478.7	1,352.2
		559,[illegible]40,000 Ac.	306,368,000 Ac.	865,408,000 Ac.

		Percent of OCS "Shelf"	Percent of Total OCS
TOTAL FEDERAL OCS ACREAGE EVER OFFERED FOR LEASE THROUGH 8/4/81	47,165,293	8.4	5.5
TOTAL FEDERAL OCS LEASED THROUGH 8/4/81	20,511,938	3.7	2.4
TOTAL FEDERAL OCS CURRENTLY UNDER LEASE 8/4/81(3)	11,400,000	2.0	1.3

---

(1) Areas within three nautical miles of coastline, except for Texas and the Gulf Coast of Florida where the boundaries are three leagues (nine nautical miles) distant.

(2) Includes state areas.

(3) Approximate acreage figure is used because of constant company relinquishments of leases—approximately 200 leases relinquished each year.

N.A. Not Available

[1] Estimated

[2] All native gas in storage reservoirs formerly classified as proved reserves of natural gas is included in this figure.

[3] Figures exclude 26 trillion cubic feet in Prudhoe Bay, Alaska (discovered in 1968) which are not yet available for market due to the lack of transportation facilities.

[4] Figures include 26 trillion cubic feet in Prudhoe Bay, Alaska.

[5] Figure excludes 26 trillion cubic feet in Prudhoe Bay, Alaska. When Prudhoe Bay is included, figure is 37,196,359 MMCF.

[6] Figure excludes 26 trillion cubic feet in Prudhoe Bay, Alaska. When Prudhoe Bay is included, figure is +15,637,573 MMCF.

[7] The net difference between gas stored in and gas withdrawn from underground storage reservoirs, inclusive of adjustments and native gas transferred from other reserve categories. (Adjustments include change of reporting basis starting in 1973 to report only gas reserves considered recoverable, in effect, reducing gas reserves by 1,024,140 MMCF that would have been reported since 1972 using former basis.)

---

[1] Original member 1960

[2] Saudi Arabia and Kuwait share the production from the Neutral Zone on a 50-50 basis

[3] Joined in 1961

[4] Joined in 1962

[5] Aubu Dhabi joined in 1967. Figures reflect only Abu Dhabi reserves until 1974 when membership was transferred to the United Arab Emirates which includes Dubai and Sharjah.

[6] Joined in 1969

[7] Joined in 1971

[8] Joined in 1973

[9] Joined as an associate member in 1973 and became a full member in 1975

EMERGENCY ENERGY CONSERVATION MEASURES HAVING POTENTIAL FOR SIZEABLE SAVINGS IN NEAR FUTURE

		Maximum Savings, per year, Equivalent Barrels per day*
1.	Reset thermostats controlling room temperature in homes (By 3° summer and winter)	550,000
2.	Improve efficiency of energy utilization in industry (2%)	280,000
3.	Improve efficiency of energy use in commercial buildings (10%)	400,000
4.	Mandatory automobile tuneup every 6 months	140,000
5.	Stop use of hot water for laundering (cold water detergents)	180,000
6.	Reduce speed limits for passenger cars to 50 MPH	250,000
7.	Increase load factors on commercial aircraft to 70% from 50%	120,000
8.	Wider use of car pools (2.3 passengers in lieu of 1.3)	780,000
	Annual Average Total	2,700,000
	Winter Rate Total	3,300,000
	Summer Rate Total	2,100,000

---

*Total of all petroleum products plus natural gas plus other energy derived from petroleum, such as electricity produced by oil, rounded to two significant figures. Natural gas saved can be used to substitute for oil, since many oil users can burn both oil and gas.

THE FOLLOWING EQUIVALENTS ARE DERIVED FROM THE USE OF BRITISH THERMAL UNIT HEAT VALUES[1]

		Crude Petroleum (42 gal. barrel)	Anthracite Coal (short ton)	Bituminous Coal (short ton)	Natural Gas-Dry (1000 cu. ft.)	Distillate Fuel Oil 42 gal. barrel)	Residual Fuel Oil (42 gal. barrel)	Liquefied Pet. Gas (42 gal. barrel)
Crude Petroleum	42 Gal. Bbl. equals	–	0.228	0.221	5.604	0.996	0.923	1.446
Anthracite Coal	Short Ton equals	4.379	–	0.969	24.541	4.361	4.040	6.333
Bituminous Coal and Lignite	Short Ton equals	4.517	1.031	–	25.314	4.498	4.167	6.532
Natural Gas-Dry	1000 Cu. Ft. equals	0.178	0.041	0.040	–	0.178	0.165	0.258
Distillate Fuel Oil	42 Gal. Bbl. equals	1.004	0.229	0.222	5.628	–	0.927	1.452
Residual Fuel Oil	42 Gal. Bbl. equals	1.084	0.248	0.240	6.074	1.079	–	1.567
Liquefied Petroleum Gas	42 Gal. Bbl. equals	0.692	0.158	0.153	3.875	0.689	0.638	–
1/ B.T.U. Heat Values as used by Bureau of Mines	1000s	5,800	25,400	26,200	1,035	5,825	6,287	4,011

Other Refined Products' B.T.U. Values (1000s): Gasoline 5,248; Kerosine 5,670; Lubricants 6,064.8; Wax 5,537.3; Asphalt 6,636; Miscellaneous 5,796; Natural Gasoline 4,620 Per 42 Gallon Barrel

GALLON, BARREL, POUND AND TON EQUIVALENTS FOR CONVERTING MEASURES OF CRUDE PETROLEUM AND REFINED PETROLEUM PRODUCTS

	Gravity at 60°F[2]	Gallons Per Pound	Pounds Per Gallon •	Pounds Per 42 Gal. Barrel	Barrels Per Short Ton 2,000 Pounds	Barrels Per Metric Ton 2,204.6 Pounds	Barrels Per Long Ton 2,240 Pounds
Crude Petroleum (Foreign)	25.6	.13333	7.500	315	6.349	6.998	7.111
Crude Petroleum (Domestic)	36.0	.14217	7.034	295	6.770	7.463	7.582
Gasoline and Naphtha	59.5	.16215	6.167	259	7.721	8.511	8.648
Kerosine	43.0	.14812	6.751	284	7.053	7.775	7.900
Distillate Fuel Oil	31.3	.13817	7.237	304	6.580	7.253	7.369
Residual Fuel Oil	18.0	.12687	7.882	331	6.041	6.660	6.766
Lubricating Oil	25.6	.13333	7.500	315	6.349	6.998	7.111
Lubricating Grease	33.4	.13996	7.145	300	6.665	7.346	7.464
Wax (Refined and Unrefined)	45.0	.14982	6.675	280	7.134	7.864	7.990
Asphalt	5.8	.11634	8.596	361	5.540	6.106	6.205
Coke	–	.10479	9.543	401	4.990	5.500	5.589
Road Oil	14.5	.12390	8.071	339	5.900	6.503	6.608
Petroleum Jelly and Petrolatum	33.4	.13996	7.145	300	6.665	7.346	7.464
Liquefied Petroleum Gas	–	.22104	4.524	190	10.526	11.603	11.789
Gilsonite	5.0	.11583	8.634	363	5.515	6.080	6.177

[2] For each product the gravity listed is assumed to be representative of the average

Still Gas 3,600 Cu. Ft. = One 42 Gallon Barrel
U.S. Gallon = .833 Imperial Gallon
Imperial Gallon = 1.2 U.S. Gallons
